Project Description

Principal's Priority

4

Begich Middle School has been awarded a partial grant for installation of a WECS (Wind Energy Conservation System) on our school property. The Department of Energy, UAF, and Renewable Energy Alaska Project are administering the grant to foster renewable energy initiatives in schools, providing both wind turbines and renewable energy curriculum for schools. In order to accept the partial grant, Begich MS needs to raise enough money to allow electrical conduit to reach the wind turbine location as well as concrete for a foundation.

Benefits if Project is Funded

This project will have a lasting positive impact on all current and future Begich MS students. Renewable energies are a hot button societal issue and will continue to be as we deplete our fossil fuel reserves. Exposing students to renewable energy efforts on a local scale will prove to be invaluable to students. If not funded we will not be able to take advantage of the \$15,000 + partial grant we were awarded for the wind turbine and curriculum.

Impacts if Project is not Funded

of Students impacted by project 1000

Project Start Year 2011

Project Finish Year 2012

Project has matching funds are available No

Project has prior state funding available No

Project has federal funding available No
